SUMMARY

A 6th-semester Informatics Engineering student at ITS with over one year of practical experience in intelligent laboratory management and technical competitions. Proven track record in engineering scalable web platforms, leading technical lab sessions, and managing cross-functional teams. Skilled in full-stack web development, AI/ML engineering, database management, and cybersecurity. Seeking opportunities to apply technical expertise in web development, AI systems, and data management to drive meaningful impact.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) <i>Informatics Engineering (Semester 6) - GPA 3.82 / 4.00</i>	August 2023 - Present
SMAK St. Louis 1 <i>Science Major - 90.35 / 100.00</i>	July 2020 - May 2023

EXPERIENCE

Project Manager - Mental Health Analysis System <i>Institut Teknologi Sepuluh Nopember</i> Led the development of a Mental Health Analysis System that analyzes students' mental health conditions and delivers personalized recommendations based on user inputs.	February 2026 - June 2026
Practical Work - Data Mining <i>Institut Teknologi Sepuluh Nopember</i> Performed web scraping on Kitabisa.com and conducted Exploratory Data Analysis (EDA) and clustering on the collected dataset.	February 2026 - Present
Teaching Assistant - Database Management Course Delivered support during lecture sessions on advanced database management concepts while troubleshooting SQL and database architecture issues for students during hands-on exercises.	February 2026 - Present
Thematic KKN Team Coordinator <i>Intelligent Information Management Laboratory</i> Led and managed a cross-functional team to build and deploy web platforms for over 40 kindergartens, including training sessions for staff and administrators.	July 2025 - December 2025
Teaching Assistant Coordinator - Database Systems Course Directed and mentored a team of Teaching Assistants while guiding students through lab practicums focused on relational database design, data querying, and system optimization.	August 2025 - December 2025
Teaching Assistant - Computer Networks Course Facilitated practical laboratory sessions on network topologies, routing, and switching while assisting the principal lecturer in evaluating assignments and configuring network simulation environments.	August 2025 - December 2025

COMPETITION EXPERIENCE

Data Analytic Competition - Face Recognition System Developed a face recognition system to detect real or fake face images using deep learning frameworks (PyTorch) to distinguish between authentic and manipulated facial data.	March 2026
Capture The Flag (CTF) Competed in web exploitation challenges, identifying and exploiting security vulnerabilities in web applications using techniques such as SQL injection, XSS, and authentication bypass.	May 2025
Web Development Competition - Healthcare Web Platform Designed and developed a full-featured healthcare web platform enabling doctor listings, appointment booking, and online medical consultations as part of a national-level competition.	September 2024 - October 2024

PROJECTS

MenTech - Mental Health Platform for ITS Students <i>Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, JWT</i> Developed a full-stack mental health platform for ITS students integrated with myITS, featuring DASS-21 psychological assessments, mood tracking, CBT-based resources, and anonymous community support, with role-based authentication and a comprehensive QA testing process. [Link]	2026
---	-------------

Xenotimes - AI-Powered News Analyzer Platform

2025

Next.js, TypeScript, Python, Supabase, AI API

- Built a full-stack news platform that classifies articles as Facts, Opinions, or Hoaxes using an AI API, with a decoupled Python microservice on Hugging Face handling AI inference and web scraping. [\[Link\]](#)

AcademiQ - Student GPA Prediction System

2025

Python, Scikit-learn, XGBoost, Random Forest, Gradio

- Built a machine learning model to predict student GPA based on behavioral and socioeconomic factors such as study hours, sleep, stress level, and social media usage, deployed with an interactive Gradio web interface. [\[Link\]](#)

Game of Bones - 2-Player Networked Platformer Game

2025

Python, Pygame, Client-Server Architecture

- Developed a 2-player networked platformer game using Python and Pygame, implementing a client-server architecture over HTTP to handle real-time player interactions and multi-stage gameplay. [\[Link\]](#)

HealthPal - Healthcare Web Platform

2024

HTML, CSS, JavaScript

- Developed a full-featured healthcare web platform enabling doctor listings, appointment booking, online medical consultations, and health-news aggregation. [\[Link\]](#)

ORGANIZATION

Student Talent and Interest Staff

March 2023 - December 2025

HMTC - Institut Teknologi Sepuluh Nopember

- Coordinated talent development programs and facilitated skill-building initiatives for informatics students.
- Organized academic and non-academic events aimed at enhancing students' technical skills and professional networking.

Laboratory Administrator

June 2025 - Present

Intelligent Information Management Laboratory

- Managed day-to-day IT operations and maintained laboratory infrastructure, ensuring optimal hardware and software performance for academic research.
- Collaborated with team members to execute technical community service initiatives and hands-on data and web projects.

SKILLS & LANGUAGES

- **Programming Languages:** Python, JavaScript, TypeScript, C++, Java
- **AI / Machine Learning:** TensorFlow, PyTorch, Scikit-learn, XGBoost, Pandas, NumPy, Gradio
- **Database Management:** MySQL, PostgreSQL, MongoDB, Prisma ORM
- **Web Development:** HTML, CSS, React.js, Laravel, Node.js
- **UI/UX Tools:** Figma, Canva
- **Version Control & Tools:** Git, GitHub
- **Languages:** English (Intermediate), Indonesian (Native)
